Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from Cold Storage, Heating, and Ventilating on Board Ship Every problem in engineering requires a special solution when applied to marine work. The limitations of weight and space on board ship, and the absolute necessity for reliability and economy introduce factors which can be disregarded in many similar problems in connection with machinery installed on shore. Refrigerating machines and heating and ventilating apparatus are no exceptions to this rule, and in this book an attempt has been made to treat the problem of cold storage and heating and ventilating exactly as it presents itself to a naval architect and marine engineer. The reader will find the treatment not merely descriptive, but thoroughly practical from an engineering standpoint. About one-third of that part of the book which deals with cold storage is devoted to a discussion of faults which may occur in the apparatus. Directions are given for hunting down various troubles and repairing them, and, what is more important, explicit instructions are given for operating various types of plants, so as to avoid breakdowns. Comparatively little has hitherto been published on the subjects covered by this book. Therefore, exceptional pains have been taken to make the present treatment exhaustive and thoroughly up to date. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
